

December 14, 2017

We have a club project going on where several of us are helping Mark Elsworth get his 70 El Camino running again. It has been down for 5 years or more due to his illness.

If anyone has any parts that they would like to donate to the project please give me a call. If you have anything else that you think we might need then please give me a call – David Gohring

We have the donated engine running and we are now working on the brakes to make sure that it can stop.

We are almost done.

I would like to thank everyone that has donated their time, parts and money to make this project a success.
